CBEC Eco Engineering, LLP, a Verdantas Company (cbec), is based in West Sacramento, California, with branch offices in Northern California and nationwide. We specialize in eco engineering, a term that refers to the practice of water resources engineering in ways that provide ecologically-sensitive and environmentally-sustainable solutions in the fields of hydrology, hydraulics, geomorphology, water quality, and restoration design. cbec offers a stable job environment, competitive compensation and benefits, and opportunities for career growth.

cbec is seeking to hire a skilled **Ecoengineer/Ecohydrologist II** to assist the company in providing technical services to clients and managing projects. Individuals' professional experience should include a combination of technical and project management experience in water resources, and a degree in civil engineering, environmental engineering, water resources, hydrology, or fluvial geomorphology (or similar).

Responsibilities include:

The Ecoengineer/Ecohydrologist II will be responsible for leading the completion of technical work, managing projects and assisting with proposals for new work. Technical work may include hydraulic/hydrologic and geomorphic studies, modeling, assessments, and associated reporting. Design work will include restoration-oriented civil construction projects in riverine or other aquatic settings, and the production of construction drawings, specifications, cost estimates, and design reports. Specific responsibilities will likely include:

- Managing small to moderate-sized multi-objective, multi-stakeholder projects
- Contributing to/leading development of numerical hydrologic, hydraulic, sediment transport, and water quality models

- Overseeing field data collection efforts that include general watershed reconnaissance; topographic and bathymetric surveys; water level, discharge and sediment transport measurements; and geomorphic assessments
- Contributing to/leading design and development of construction plans for complex environmental rehabilitation projects in riverine, wetland and estuarine settings
- Writing reports
- Presenting project findings at client meetings and conferences
- Assisting with and sometimes leading proposal development efforts
- Growing client relationships and helping bring in new work
- Contributing to the growth and development of the company and staff

Desired Skills and Experience:

- 2+ years of project management experience
- Bachelor's in civil or environmental engineering, water resources or closely related field, and Master's or doctorate in civil engineering, environmental engineering, water resources, hydrology, or fluvial geomorphology is preferred
- Licensed California State professional civil engineer or ability to obtain license via reciprocity (other professional qualifications will be considered)
- Experience with various components of technical studies including fieldwork, analyzing and evaluating data, and preparing reports
- Experience developing, applying, and using hydrologic and hydraulic computer modeling applications, such as HEC-RAS (1D and 2D), HEC-HMS, MIKE 11, MIKE 21, SRH2D, FLO-2D, TUFLOW, and Delft3D
- Programming experience, such as using python or R to analyze geospatial and time series data, is desirable
- Experience with design and drafting efforts and preparation of construction drawings, specifications, cost estimates, and design reports
- Experience assisting with proposal development
- Strong written and verbal communication, and organizational and time management skills
- A competent swimmer comfortable working in and around water is preferred
