

Ecoengineer/Ecohydrologist I

Location: Northern California (West Sacramento or Santa Cruz) or Upper Midwest.

Experience: 2+ years of experience plus a four-year college degree, or a masters degree or PhD. Valid driver's license.

Compensation: commensurate with experience. Salary (\$65,000 - \$92,000).

CBEC Eco Engineering, LLP, a Verdantas Company (cbec), is based in West Sacramento, California, with branch offices in Northern California and nationwide. We specialize in eco engineering, a term that refers to the practice of water resources engineering in ways that provide ecologically-sensitive and environmentally-sustainable solutions in the fields of hydrology, hydraulics, geomorphology, water quality, and restoration design. cbec offers a stable job environment, competitive compensation and benefits, and opportunities for career growth.

cbec is seeking to hire a skilled **Ecoengineer/Ecohydrologist I** to assist the company in providing technical services to clients. Individuals' professional experience should include a combination of technical experience in water resources, and a degree in civil engineering, environmental engineering, water resources, hydrology, or fluvial geomorphology (or similar).

Responsibilities include:

- Performing technical studies in the fields of hydrology, hydraulics, geomorphology, water quality and restoration design
- Developing numerical hydrologic, hydraulic, sediment transport and water quality models
- Performing field data collection that includes topographic and bathymetric surveys; discharge and sediment transport measurements; water quality monitoring; and geomorphic assessments
- Performing design and drafting work in AutoCAD for the development of construction plans for environmental rehabilitation projects
- Contributing to writing and figure production for technical reports
- Potentially managing small projects and supervising junior staff

Desired Skills and Experience:

- 2+ years of experience and a bachelor's in civil or environmental engineering, water resources or a closely related field; or a master's or doctorate in civil engineering, environmental engineering, water resources, hydrology, hydrogeology, or fluvial geomorphology
- Licensed California State professional civil engineer (or ability to obtain license via reciprocity) or an Engineer-in-Training status is desirable
- AutoCAD experience including the use of grading tools, objects and corridors, and plan set development
- ESRI ArcGIS experience including managing geodatabase infrastructure and using Spatial Analyst and 3D Analyst tools
- Experience developing, applying, and using hydrologic and hydraulic computer modeling applications, such as HEC-RAS (1D and 2D), HEC-HMS, MIKE 11, MIKE 21, SRH2D, FL0-2D, TUFLOW, and Delft3D
- Programming experience, such as using python or R to analyze geospatial and time series data, is desirable
- Strong written and verbal communication
- Strong organizational and time management skills
- A competent swimmer comfortable working in and around water is preferred

As part of field efforts, the ideal candidate should be willing to undertake manual tasks in an outdoor environment, alongside or in water, and on watercraft. Tasks may include wading in flowing water to collect topographic data and hydraulic measurements, or performing surveys on construction sites and other similar scenarios. Travel to remote settings for more than one day may be required.
